

### Creative workshop of OBRA

## European Observatory for Long-Term Governance on Radioactive Waste Management

31<sup>th</sup> January to 2<sup>th</sup> February 2007

**Eurajoki, Finland**

---

### General Information

---

OBRA is a Coordination Action within the EURATOM FP6 which aims to assess the feasibility of creating a model for a European Observatory for Long-term Governance on Radioactive Waste Management. OBRA aims to contribute to the better governance of radioactive waste by providing mechanisms for all stakeholders to have access to the knowledge that has been generated by successive EU research programmes.

---

### Aims of this workshop

---

The first workshop of this project aims to build up a participatory approach to:

- Discuss different models for an observatory for radioactive waste management in Europe ;
- Foster the exchange of knowledge between different stakeholders in the radioactive waste management field;
- Identify topics of interest that the observatory should tackle and to develop a training course on this subject.

---
